

EcoNugget

We will SAVE over 630 million litres of fuel or take 320,000 cars off the road if all drivers in Canada practise no idling for 3 min a day for the entire year.

YOU CAN BE PART OF THE SOLUTION

Follow these IDLE-FREE Zone Tips

- Turn off your engine if you are parked for more than 60 seconds (except in traffic).
- Drive your vehicle to warm it up. If you need to idle, 2-3 minutes is enough.
- Avoid long warm-ups with remote car starters.
- Use a block heater. Start block heater with an automatic timer 2 hours before leaving.
- Tell family and friends about the benefits of reduced idling to save money, optimize health and help protect the environment too!
