Adopt a Storm Drain!

Storm drains on our roads often go unnoticed, but they help protect against flooding and keep debris out of our waterways.

You can help by adopting a storm drain near where you live, work or go to school. Give back to your community in this simple way and help protect both public and private property.

What is involved?

- Keep your storm drain clear of litter, leaves in the fall, and snow and ice in winter.
- The perfect time to check your storm drain is before and after a heavy rain, especially in fall.
- Stand on the curb and use a rake, broom or shovel to move debris away from the grate.
- Be safe and be aware of traffic in the area.
- Supplies: gloves, shovel, rake, broom, garbage bag.
- You have helped the environment near your home!
