EcoNugget

JOIN the 20+ million people who plant trees just by searching the Web using ECOSIA

Ecosia is just like any other search engine, with one major difference: **at least 80%** of its advertising profits are used to plant trees around the world.

Did you know that Ecosia:

- Plants over 500 different native species where they are needed most.
- Has planted 175 million trees in 35 countries in more than 13,000 different planting sites.
- Publishes monthly financial reports and tree planting receipts so you can see exactly how income from your searches is spent.
- Uses solar panels to produce twice as much renewable electricity as is required to power all Ecosia searches.
- Is privacy friendly. They don't create a profile of you or sell your personal details to advertisers.
